

Vertox Pellet Bait

Vertox Pellet Bait is a ready-for-use bait containing 50 ppm of the second generation single-dose anticoagulant rodenticide brodifacoum together with 10 ppm of the human aversive agent *denatonium benzoate*. The bait is formulated using food grade cereals and adjuvants to provide a highly palatable bait acceptable to a wide variety of rodents, including all commensal species. Conveniently packed in 500 gm jars, containing sufficient bait under normal control circumstances for up to 50 bait points for mice and up to 25 bait points for Brown or Black rats.

Reliable and Cost Effective

- **Effective on all Commensal rodents, such as the Brown Rat, Black Rat and House-mouse, as well as many other pest species.**
- **Vertox Pellet Bait contains the single-dose anti-coagulant brodifacoum and the human aversive agent *denatonium benzoate*.**
- **Vertox Pellet Bait contains a blend of high grade cereals and other substances and offers consistent, assured high kill of rodents.**
- **Vertox Pellet Bait is highly palatable, does not cause 'bait shyness', does not require 'pre-baiting' and needs only a small amount of bait to achieve control, proving to be a most cost-effective rodenticide.**
- **Ready-for-use formulations give consistent results, time after time.**
- **Available in a convenient 500 gm pack suitable for many bait points.**
- **Vertox baits are effective against rodents resistant to warfarin, chlorophacinone and diphacinone.**
- **Vertox baits can be effectively antidoted with Vitamin K₁.**
